Maurizio Rendon

Senior Software Engineer · Full stack (Back End and Front End)

LinkedIn: linkedin.com/in/rendon7 · GitHub: github.com/mauriz3 · CodePen: codepen.io/maurirz3

Summary

Senior full stack engineer, working mostly on Back End and Front End. I build web platforms, dashboards, PWAs and CMS sites on serverless architectures and servers. I use AI in my development workflow and to automate processes, including MCP integrations and chat assistants for clients. I enjoy helping people and solving problems: I build web platforms and dashboards that present data clearly. Creative thinking + UX + prototyping = Minimum Viable Product. End to end: from Node APIs and the data layer to React and Vue interfaces.

Experience

Senior Software Engineer

Octane11 · New York · Feb 2022 – Present

B2B platform for data integration and enrichment. Full stack work across Back End and Front End.

- Building a dashboard that shows analytics, and a CMS to configure it.
- Building API endpoints and Back End services in Node.js with Prisma.
- Using Chart.js for the charts.
- Implementing AI to analyze data, automate processes and assist customers.

Front End & DevOps Engineer

System73 · Tenerife · Feb 2016 – Feb 2022

Software for OTT video delivery: highest resolution and guaranteed delivery for an unlimited number of concurrent linear video streams, with analytics.

- Front End (2018–2022): Vue, Nuxt, WordPress, JavaScript, CSS, unit tests, documentation, git and Django.
- DevOps (2016–2018): Jenkins pipelines, integration tests, Docker, Python, Bash, Linux servers and AWS.

New Technologies Project: tools for the social inclusion of deaf people

FASICAN · Dec 2014 – Jun 2015

Project financed by the European Social Fund and the State Public Employment Service, to ease contact and communication between FASICAN, deaf people and society through new information and communication technologies.

- Deployed an online video interpretation service in Spanish Sign Language (SVisual).
- Researched and implemented ICT solutions.
- Web positioning.
- Programming in HTML, CSS, JavaScript and PHP.
- Created the FASICAN website.

University internship

Open Canarias · Mar 2014 – Jun 2014

Developed Java plugins for the Eclipse environment using design patterns.

- Collaborated on a research project of the R&D department.

Higher National Diploma internship

Hospital Universitario de Canarias · Mar 2010 – Jun 2010

Maintenance and management of the hospital's computer systems.

Education

Entrepreneurial development (Entrepreneurship studies)

Universidad de La Laguna · Sep 2015 – Jul 2016

Experiential learning programme to design and develop innovative projects.

Digital Marketing course

Google Actívate · 2014
